

ML1/K – Counter Loop Kit with Microphone

Everything needed for a high quality, stand-alone, counter induction loop system. The double gang, wall mounting amplifier fits standard UK 25mm back boxes and is ideal for mounting under desks, counters or table tops to generate a loop-listening field up to 1.5m. This makes it suitable for use in post offices, banks, ticket offices and other reception areas. Features one 3.5mm microphone socket with phantom power, one balanced line level audio input, and indicators for input peak, mains on and loop strength. The counter kit consists of

- ML1 Counter Amplifier
- Boundary microphone
- Counter loop cable.

Technical Specification
